Adhesive tapes

66296

Flat crepe adhesive tape

66296 101-105

Design

- In the best professional painter quality
- Heat resistant up to 80°C
- Moisture-proof

66296 201-205

type 4316

Design

- Standard industrial masking tape
- Lightly creped with good adhesion on various surfaces
- Stretchable and flexible
- Easily removable

Applications

General covering work up to a temperature of 100°C.

66296 101-105

66296 201-205

Width mm	Length m	Colour	66296	...	tesa	66296	...

66294

Soft PVC adhesive tape

66294 101

Design

- Crosswise grooving
- UV-resistant
- Adhesive layer can be completely removed

Applications

Specially designed for areas exposed to the sun and anodised metal surfaces.

66294 201-202

type 4172

Design

- Made from soft and tear-resistant plasticised PVC film and synthetic rubber adhesive
- Resistant to moisture
- Resistant to cold, weak alkalis and acids as well as many chemicals

Applications

Protects the surfaces of delicate profiles, frames and veneers from dirt and damage from materials and tools before and during construction work. Can be used for plasterwork, painting and masonry.

66294 101

Width mm	Length m	Colour	66294	...	tesa	66294	...

66294 201

66294 202

66295

Fabric adhesive tape

66295 101

Design

- Mesh-reinforced PE extra strong adhesive tape
- Pigmented rubber adhesive with high adhesive force for almost any surface
- Colour silver grey, black

Applications

As standard assembly tape for masking pipes and ventilation slots, as well as to fasten films to metal, plastic, plaster and concrete. Can be used at temperatures of between -20°C and +80°C.

66295 201-202

type 4688

Design

- High initial adhesive force, even on rough surfaces
- Easy to tear off by hand
- Easy to unroll
- Waterproof and resistant to ageing
- Strong but flexible

Applications

For marking, covering, packaging, protecting, sealing etc. For fixing cables and as a floor marker for theatre and stage applications. For securing attachments, general marking work, sealing of bags and cardboard boxes.

Can be used as a versatile repair tape.

Special tools / PPE

62353

Fabric adhesive tape

62353 101

Design

- Sealed surface
- Resistant to weathering and ageing
- Can be written on
- The electronic properties are much higher than the requirements for Type G2 according to VDE 0340, Part 2/DIN 40633, Page 2

Applications

For installation and repair work.
For wrapping, reinforcing, protecting, sealing, fastening and marking of cables, wires and connections.

62353 201-203

Type 4651

Design

- Strong adhesive, even on rough, fibrous surfaces and surfaces treated with a release agent
- Waterproof, resistant to weathering and ageing
- Excellent tensile strength
- Can be written on, soft, smooth and abrasion-resistant
- Very easy to tear by hand

Applications

For bundling and reinforcing pipes and profiles, masking of drill holes and other openings. Marking of cables, fixing and insulation of cables. Colour coding of wires, permanent, air-tight sealing of wiring, etc.

62336

Double-sided adhesive tape

3M

Type 9088

Design

- Double sided adhesive tape with polyester carrier
- Modified acrylate adhesive
- Good UV and temperature resistance

Width mm	Length m	62336	...
25	50		101
50	50		102

Applications

Suitable for a wide range of high and low-energy surfaces. Suitable for universal use.

62336

62341

Assembly tape

3M

Design

- Double-sided adhesive tape made from closed-cell acrylate adhesive
- Good adaptability to the surfaces to be bonded
- Bonds entire surfaces without clamping, regardless of whether they are smooth or textured

62341 101

Type 4611 F

Applications

For bonding metals such as steel, stainless steel and aluminium and other high-energy materials such as, for example, painted surfaces, painted wood, glass, ceramics and many plastics.

62341 102

Type 4910 F

Applications

For bonding transparent materials such as glass, polycarbonate, acrylic glass (PMMA) and other high-energy materials such as, for example, metals, painted surfaces, painted wood, ceramics and many plastics.

62341 103

Type 5952 F

Applications

For bonding low-energy materials such as, for example, powder coatings and high-energy materials such as, for example metals (e.g. steel, stainless steel and aluminium), painted surfaces, painted wood, glass, ceramics and many plastics (e.g. rigid PVC, ABS, acrylic glass/PMMA, polycarbonate).

62341 103

Special tools / PPE

62337 Aluminium adhesive tape

3M

Design

- Outstanding sealing properties thanks to good moisture shielding (water vapour diffusion)
- A combination of robust aluminium and durable adhesive for problem-free long-term applications
- Low flammability (class L)
- Good resistance to chemicals

- High level of resistance to ageing and weathering
- Strong heat and light reflection

Applications

For masking, sealing, heat and light reflection, covering surfaces during aluminium anodising and for use as a moisture barrier.

62338 Universal hook and loop tape

3M

Design

- Universal hook and loop Scotchflex tape for permanent as well as releasable bundling of cables, etc.

62338

Width mm	Length m	62338	...
20	10		101

62339 Universal hook and loop tape

3M

Design

- Dispenser with 5 m hook and loop tape for easy use
- The releasable fastening system allows for quick and easy assembly or disassembly and non-visible fixing
- The synthetic rubber adhesive ensures the highest retention force on all surfaces

Applications

For quickly detachable connections in mechanical engineering, automotive and trade fair construction.

62339

Width mm	Length m	Colour	62339	...
25	5	black		101

62340 Electrical insulating tape

3M

Design

- Scotch™ 23 electrical insulating tape, self-fusing
- Binds homogeneous fused winding layers
- Excellent dielectric properties
- Weather-resistant

62340

Width mm	Length m	62340	...
19	9.15		101

62343 - 62351 Electrical insulating tape IEC 60454

Design

- High-quality soft PVC film, combined with an ageing-resistant acrylic-based adhesive material
- Tape width 15 mm
- Tape thickness 0.15 +/-0.003 mm
- High adhesive strength, soft, self-extinguishing, lead-free, easy to work with
- Complies with VDE, ÖVE and SEV according to type test IEC 60454-3-1-10/F-PVCP/105
- Temperature-resistant from -10° to +105° C

Applications

Suitable for all standard insulation work in electrical applications. Can also be used universally for repairs, colour coding and bundling.

62343 - 62351

68389

Non-slip and floor marking tape

68389 101

Type 60951

Non-slip tape

Design

- Very good adhesive strength on various surfaces
- UV, moisture and salt water resistant
- Step safety in hazardous areas such as stairs, steps, slopes, ladders, ramps, car trailers, scaffolding etc.
- Long-lasting non-slip effect

Applications

Suitable for use indoors and outdoors.

68389 102

Type 4169

Floor marking tape

Design

- Robust, durable carrier
- Soft, can be applied in curves
- Sticks on dry and clean floors
- Can be driven over by a forklift

Applications

Suitable for permanent, demanding marking both indoors and outdoors, marking boundaries of work areas, paths and playing fields.

66298 Hand dispensers/Stretch film

66298 101
Hand dispensers
Design
 - Inexpensive standard dispenser unit
 - With a ball bearing
 - Centring disc made from plastic
 - Adjustable dispenser brake to regulate film tension
Applications
 For film width 420/450/500 mm.
 For cardboard core diameter 38/50/76 mm.

Note:
 Stretch film not included in scope of delivery.

66298 102
Hand-stretch film
Design
 - For reliable, inexpensive pallet securing
 - Extremely versatile
 - Protection against dust, moisture and theft
 - Economic material consumption, 300 running metres provide up to 450 winding metres
 - The higher the protection requirement or the pallet weight, the thicker the film should be
 - Stretch film adhesion on both sides
 - Strength/thickness 17 µ
 - Film width 500 mm
 - Core diameter 50 mm
 - Colour transparent

Type	66298	...
Hand dispenser		101
Stretch film		102

66299 Manual dispenser/Adhesive tape

66299 101
Hand dispensers
Design
 - Very robust metal dispenser
 - Static strip always holds the adhesive tape onto the pressure roller
 - With soft handle
 - With adjustable roll brake
Applications
 Suitable for 50 mm roll width.

Note:
 Adhesive tape not included in scope of delivery.

66299 102
PP adhesive tape
Design
 - Very high resistance to tearing due to biaxial stretching
 - Resistant to UV and ageing
 - Resistant to diluted acids and alkaline solutions
 - Environmentally friendly water-based acrylate adhesive
 - After storage and processing at room temperature, cold-resistant down to approx. -30°C
 - Heat-resistant - in the short term up to approx. +130°C
 - Adhesive strength: 2.2 +/- 0.6 N/cm
 - Tear-out force: 40 N/cm
 - Strength/thickness 50 µ
 - Colour transparent

66534 Squeegee

66534 101-102 Design
- **Rugged design metal body** with double foam rubber lip
- Riveted steel handle holder for particularly strong handle grip
Applications
Suitable for broom handles with diameter 24 mm. Broad range of uses, ideal for high loads.

66534 201-202 Design
- **Wooden body** with double foam rubber lip
- Heavy-duty design for a perfect contact surface
- Handle hole with additional metal handle holder for secure handle grip
Applications
Suitable for broom handles with diameter 24 mm. Ideal for removing large amounts of water.

66534 301-302 Design
- **PVC body** with aluminium rail and hard rubber lip, can also be used with telescopic rods due to wooden handle
- Household squeegee

66535

Street broom

66535 101

Design

- Coarse, powerful street broom with red, strong Elaston fibre bristles, made in Germany
- Water-resistant and dimensionally stable
- Heat resistant up to 60° C

Applications

Ideal for coarse and moist outdoor dirt.
For handles with 24 or 28 mm diameter (cone).

66535 102

Design

- Top quality wooden handle, made in Germany
- Very robust, durable and stable, produced from hardwood with very little residual moisture

Applications

Ideal for demanding applications with an increased material load. Suitable for brooms, scrubbing brushes and other devices with full length handle hole (not suitable for POWER-STICK PVC handle holder).

Eco mop system

KÄRCHER

makes a difference

66541 101

Eco mop system with telescopic handle

Design

- High-quality and dimensionally stable dust mop (holder) with telescopic adjustable handle 97-184 cm
- The mop system facilitates working in this way due to individually adaptable ergonomics and easy handling
- This includes, in particular, the height-adjustable telescopic handle and the automatic clamping system
- The automatic clamping system allows mop covers to be replaced easily without touching
- Rounded corners make it noticeably easier to insert the mop cover
- The mop holder is opened simply and quietly using the round push button
- The lockable mop holder joint makes it easy to wipe on vertical surfaces
- The joint trough supports cleaning under furniture and installations

66541 102

Cotton mop

Design

- 40 cm with pockets for standard cleaning tasks

66541 103

Microfibre mop

- 40 cm with abrasive strips and pockets for stubborn dirt

Cleaning trolley

KÄRCHER

makes a difference

Design

- Double bucket trolley made from 100% polypropylene
- Corrosion-free, very mobile and with jaw-type mop wringer
- Very hygienic and easy to clean

- Two colour-coded buckets (15 litres each)
- Broad and easily accessible sliding handle
- Easy-to-use universal mop wringer
- Jaws of the wringer close with the base (no inserts required)
